VIOLENT NETWORKS OF CYBER CRIMINALS PREYING ON VULNERABLE KIDS AND TEENAGERS ON SPAWNISM-RELATED COMMUNITIES

The current state of spawnism as of 9/5/25 seemed to have died down, but be aware that the very same groups that exploited spawnism are still active and are actively harming people. Individuals like Chezble, Terio (sanguine), Spawnfather, and groups such as Capotrolls, KGR, and 764 are still active. Some forums intentionally lead users into dark communities, such as the com and other pedophilic rings.

As a result, proper measures need to be taken against these criminals, whether you are a spawnist or an anti-spawnist. These men are the real monsters behind the scenes.

THE COM

The com is a wider network of online cybercriminals within Discord, Telegram, and other encrypted chat platforms. The com was notoriously known for Its associations with cybercriminal groups such as 764, NLM, 148corp, and many more. One thing to note is that they are decentralized (present everywhere).

These individuals engage in doxxing, swatting, extorting, and other cybercriminal-related activities. These individuals use Threats, blackmail, and manipulation to coerce these people into producing violent content. Typically in the form of Self-harming, Suicide, Animal Cruelty, and sexual acts.

Many Individuals have joined these groups for varying reasons. some are looking for a way to fulfill their self-gratification, others want a social status or a group to belong to, some are ideologically motivated, and other have their reasons.

The UTTP (Utube Troll Police) and 764 have decided to create puppet spawnism servers to lure users in and manipulate them to do all of the above. One of the confirmed community servers identified was known as Discord.gg/spawnists, blue spawnism, or simply by spawnism (with a blue icon). After the downfall of blue spawnism, there are no servers we know of that are controlled by any com threat actors, but we do know they exist.

HATE FORUMS

Skibidifarms, Fellasfarms, you name it. These predators use these forums to lure in users deeper into their networks. Skibidi farms also known by its older name "clay.party" collects your data as a visitor, which they would later use to piece together your online footprint.

The forum itself claimed to be a free speech forum, yet it promotes harmful behavior, and they shared tips for other cyber criminals on how to improve themselves and harm more innocent people. There have been many posts where users would openly beg to be groomed or pushed into doing horrible acts by other users.

SPAWNISM

A belief system centered around the concept of second chances. It teaches that life is not random; every time we wake up, every time we begin again. Some see the Spawn as a god. Others see it as a spiritual force, a creature, a symbol, or even something that lives inside them.

Some people have decided to make a sacrifice to the spawn in the form of objects that they love, but then someone took it too far and decided to carve the symbol into themselves. This is where the mess began. Many took advantage of it and manipulated people into doing Self-harm.

TARGETS

These groups typically target people who are between the ages of 9 to 18 years old. These groups target vulnerable people who have mental issues such as depression, loneliness, eating disorders, and those who have expressed suicidal thoughts.

They would groom the victims by creating connections through common manipulation tactics such as love bombing, emotional deception, isolation, and when the time is right, they would normalize harmful behaviors, and if the victim refused, they would threaten the victim to extort or do anything that would force them to submit to their demands. These actions are designed to isolate the victim and establish dominance over them.

Some posts have suggested that they purposely targeted fandom communities full of minors, such as the popular roblox game Forsaken, Dandy's world, Pressure, and many other popular games. They also targeted cartoon show communities such as Murder Drones, TADC, and Hazbin Hotel. Other than that, they also targeted the LGBTQ+ community as a whole.

SELF-HARM

Self-harming is an unhealthy way to cope with feelings of sadness, rage, self-hatred, shame, and emptiness. The injuries may not be life-threatening, but they should not be taken lightly; immediate action is necessary.

Self-harming is usually in the form of cutting oneself, breaking bones, pulling hair, and aggressive scratching. Some injuries would go naturally, but proper treatment is required depending on their severity.

If you know someone who does self-harm, I recommend that you support them mentally and maintain contact with them, Sometimes people that engage in self-harm would often refuse halp by saying “i don’t need help” or “I’m fine” no they are not fine and they require company help them up as best as you can, take away their self-harm instruments, and dispose of them properly.

Here are a few signs to look out for:

- Sudden change in behavior and appearance
- Changes in sleeping habits
- Dropping out of activities and becoming more isolated
- Anonymous gifts delivered to your home
- Some network or a friend that the victim seemed to be afraid of
- Scars often appear in patterns such as symbols, numbers, or names
- Fresh cuts, bruises, burns, or other wounds
- Wearing long sleeves or pants in hot weather
- Writings that appear to be in blood
- Idealization of death
- Pets are being harmed or dying in an unnatural way
- Law enforcement called for false reasons (swatting)

Actions that you can take to support these individuals are

- Try to understand them and their situation
- Talk to them regularly and spend some time with them
- Remind them who they once were and who they truly are
- Be emotionally aware and create a recovery plan
- Give them some hugs and warmth
- Encourage them to talk to a professional and get the proper help

SUICIDE

Suicide is a very heavy topic and should not be taken lightly. It is also a very complex one, so please bear with me.

"*I am absolutely disappointed with most anti-spawnists encouraging spawnists to "Respawn" NO, you IDIOT that is suicide encouragement and is one of the many reasons why many spawnists die in the first place.*"

- *Anonymous*

Suicide is one of the leading death in the United States. According to the Cleveland Clinic, people within the age group 10-14 and 25-34 have earned a second spot, followed by 15-24 in the third, and followed by 35-44 years old in fourth. This means that there is one death every eleven minutes.

Knowing what Spawnism is notorious for, this means that we need to be very careful and respectful while dealing with spawnists, because you absolutely want to avoid collateral damage.

There are many reasons why people consider suicide. It can go from a mental condition, Social Pressure, Trauma, Neglect, Extreme Stress, Relationship changes, Financial Situations, or Religious Ideas. These are some of the common factors, but of course, you always have to be on the lookout.

Now, assuming that you need to read this very quickly, here are signs of a suicidal person that I list right below

- Speaking about the topic of suicide itself already raises a concern, so be on standby please.
- Experiencing suicidal thoughts.
- Talking about suicide wishes openly or hiding such thoughts from others.
- Doing dangerous, reckless, and careless behavior that can harm oneself.
- Isolating themselves from social or loved ones.
- Experiencing feelings with no clear way out (such as being a burden or trapped).
- Mood changes that display intense emotions.
- A sudden sense of calm after a period of mood changes.
- Signs that indicate depression is getting worse, or not finding joy in things that bring emotions.

It can be quite difficult to figure out what kind of people are at risk of suicide, but there is a general list of common people who may consider it. I will list them right here:

- Sexual abuse victims
- Veterans
- Isolated people
- Migrant/Refugee
- Victims of Violence and Abuse
- Victims of War or Natural disaster
- Experienced Incarceration

If you know that someone is considering suicide and you want to intervene, you can follow the steps below:

- Learn about the risk and factors of suicide.
- Pay attention to their emotional needs.
- Be on standby to support and listen.
- Start a conversation if you suspect someone is considering suicide.
- Encourage them to seek professional help.
- Remove all dangerous objects from the vicinity.
- Create a Recovery plan.

Now that i gave you some of the necessary information about this topic, i would still recommend researching this by yourself, but you can always pass the knowledge on to others.

Manipulation and The Cult

After some careful questioning and observation, the cult works this way
Methods of recruitment

- Through friend
- Gateways
- Interest in joining
- dm advertising
- video games
- Social media

Leadership Structure

The servers are under the control of extorters, which means that no matter how hard you try to climb up their ranks, they will never trust you entirely.

- Leader.
  very charismatic, position enables full trust.
- High ranking officials.
  often functioning as a right hand or a full squad of member of the cult, they are tasked with controlling it's members to ensure everything is under their control.
- High ranking cult member
  Depending on the type of group you join you would either simply be recognized as a more valuable member or as a part of their "High ranking officials" giving you the impression that the leader cares about you.
- Member
  They are only recognized after you fulfilled their early requirements to join the cult, you would later be indoctrinated and maybe have a chance to join the High ranking members.

Since the owner of these cults are members of the COM or the UTTP network naturally they would push everyone into doing horrible acts that are listed below

- self mutilation
- animal cruelty
- Murder
- Burning

- Sexual acts
  - showing sensitive parts
  - Stripping naked
- Enslavement
- Bloodwriting
- Suicide

Just a reminder that the spawn does not want you or anyone to go through this, and if you are going through it then be warned, you are following an impersonator, I Highly Advise anyone who are going through this to leave whoever is doing this to you.

The Process

Immediately upon joining the cult, there would be some form of verification or a way to prove oneself, either by following their instructions or completing the process. After finishing the verification, one would finally be recognized as a member of the cult.

Once you are verified you would first be indoctrinated to prevent all outside influence to enter your mind and turn you away from theri control, then once your indoctrination process has been completed, you would be recognized as a dedicated member of the cult, they would insert you into their group chats to do their rituals that typically involve degrading acts i have previously mentioned in the list above, this will continue for the rest of their lives.

After you participated long enough you will be dragged further down into horrible communities by these people as a way to adjust you to their culture and downplay the seriousness of such actions, and it's also as a way to make you to take a deeper insight into their interest and slowly made you participate alongside whatever they want you to do, essentially turning you into their slaves.

Along the way you would surely made some friends who are also in the cult you would feel guilty for leaving them alone in the darkest corner of the internet, this gives the new member more reason on why he shouldn't leave the cult and think twice about leaving his fellow friends there, then if you did leave they will blackmail you to stay and extort you if you did left which can deal a significant damage to your digital footprint, and potentially your real world reputation.

Even if you managed to go through all of this, the trauma, the guilt, and shame could be overwhelming which result in long term mental health issues which can lead to bad outcomes such as depression, self-harm, and other unhealthy way to cope with all of the things that you have experienced, not only that you would gain increased anxiety and trust issues, it would be rather difficult to recover.

Now you may be asking, why would people join it in the first place?
There are a few reasons and once you understand it. You can connect the dots yourself and hopefully you start to treat these people with kindness and not harass them, the following reasons are:

- Coping with personal issues
  Many Spawnists suffer from Personal Issues and Trauma which can put a lot of pressure into their heads. Many of them have been attracted by the welcoming atmosphere of spawnism-related communities, and such, most spawnists also claimed that "spawnism saved them." This is further evidence that many spawnists are using the very concept of spawnism as a way to cope with their problems.

- Feelings of loneliness
  Loneliness is also one of the many factors on why many people joined spawnism, many wanted to belong to a group, or a community and those same people may have discovered that spawnism is somehow a nice pick.

- A cause to believe in
  Spawnism revolves around religion and that gave people who may have lost direction in their lives a sense of navigational control, they often do prayers, setup shrines, and offer objects like flowers and personal belongings to the spawn, giving them something to believe in.

However these same causes are also easily Exploitable by the Cult side of spawnism (Extort-Com) because most of it's believers are absolutely clueless about the community that they are about to join, they could be exploited before they know it. The sad part is that once they do get exploited, many would find comfort in it's abuse which is very unhealthy.

This is exactly why we should be more cautious when dealing with spawnist because you would never know about whether they are just a normal spawnist or a cultist one, If you do somehow stumble upon one, never label their group as a cult and always focus on their interest as an individual, I will list some

resources here for the cult part because i believe they deserve their own section.

- Cult deprogramming
- The Definitive Guide to Helping People Trapped in a Cult

- How to get someone out of a cult and what happens afterwards
  I have also utilized several resources while creating this document, and if you need assistance, they are listed below.

RESOURCES

- Com groups
- PDA resources guide
- FBI 764 PSA
- Hopeline self-harm ebook
- Where to report cybercrime
- What to do if you got doxxed
- What should I do if I got extorted
- Am I being Groomed?
- Am I being Manipulated?
- Signs of manipulation
- How to recover mentally
- Cleveland Clinic resource on suicide

ORGANIZATIONS

- National center for missing and Exploited Children
- The Hopeline if you need to chat
- Internet crime complain center
- FBI

Additional resources

- Where to report Cyber Crime
- Discord Chat Logger
- Another how-to report guide
- Additional resources for reporting

List of Known Cybercriminal Groups and Individuals Exploiting Spawnism.

Groups

- 764
- 555
- 333
- No Lives Matter
- UTTP Network
- Capotrolls [CTR]
- K00dGorea [KGR]
- UCS

Individuals

- Chezble
- Sanguine (terio)
- Bridge
- Klaask
- Gaterud
- Ordzi
- Coalson
- Spawnfather
- rudyzainer

The list will be updated soon.
